ATTENDEASE PLATFORM USER MANUAL

Standard Operating Procedure & Official Platform Guidelines for Store Owners

1. PLATFORM OVERVIEW & SYSTEM HIERARCHY

AttendEase provides high-integrity employee attendance tracking based on physical multi-location Wi-Fi verification and cryptographic single-device token binding.

- Store Owners / Administrators: Manage their respective outlets, configure branch Wi-Fi IPs, manage shift schedules, enroll employees, monitor live check-ins, and inspect monthly payroll attendance summaries.
- Super Admin: Platform governing authority that registers authorized store owners, allocates dynamic outlet quotas, sets monthly subscription fees, and verifies payment receipts.

2. STORE SETUP & MULTI-LOCATION OUTLETS

Every store can operate multiple physical branches or outlets within the quota assigned by Super Admin:

- Configuring Outlets: Navigate to Store Settings > Outlets. Click "Add Outlet" to define the outlet name and its registered router IPv4 address.
- Dynamic Outlets Quota: The maximum number of outlets a store can create is dynamically managed by the Super Admin. If you need more outlets, contact the platform management.

3. EMPLOYEE ENROLLMENT & SECURE DEVICE BINDING

To prevent proxy attendance and buddy punching, AttendEase enforces cryptographic hardware device tokens:

- Adding Employees: From the Employee Management page, add employee personal details, assigned outlet, and shift starting/closing hours.
- Device Activation Link: Each new employee receives an individual verification QR code and secure link. Opening this link from the employee's personal smartphone locks their attendance profile to that exact physical phone.

4. DAILY ATTENDANCE & CHECK-IN WORKFLOW

Employees check in every morning and check out in the evening through the Attendance Portal:

- Dual-Layer Verification: The system instantly confirms that (1) the device hardware token matches the verified phone, and (2) the network IP matches the store branch's authorized office Wi-Fi.
- Human-Readable Logs: Late arrival, early leave, and overtime duration are computed automatically and logged in human-readable hours and minutes (e.g. +1h 24m).

5. SUBSCRIPTION BILLING, PAYMENT DEADLINE & SERVICE SUSPENSION

Stores operate on a monthly software subscription model:

- Payment Due Date: Store owners must clear their monthly subscription fee by the designated deadline (default: 7th of the current month, or the custom day configured by Super Admin).
- Payment Channels: Invoices can be paid using Super Admin's configured receiving accounts: bKash, Nagad, or Bank Transfer.
- Submission & Verification: Store owners submit their Transaction ID (TrxID) and paid amount from the Store Invoices portal. Once verified by Super Admin, active service status continues.

WARNING: SERVICE SUSPENSION POLICY

If an unpaid invoice is not cleared by the monthly deadline day (e.g., 7th of the month), all employee attendance services are immediately suspended. Employees attempting to check in or out will be redirected to the Service Suspended page.

6. SUPER ADMIN RIGHTS, DELINQUENCY & PERMANENT STORE TERMINATION

To protect platform integrity and prevent abandoned storage consumption, strict delinquency policies apply:

- Suspension Period: A suspended store remains locked until the outstanding monthly invoice is submitted and verified by Super Admin.

CRITICAL POLICY: OVERDUE DEFAULT & COMPLETE STORE REMOVAL

If a store owner remains in overdue status for more than one month without clearing subscription fees, the platform holds the absolute legal and operational right to terminate the store owner completely. Upon deletion by Super Admin, all store records—including employees, outlets, attendance history, and uploaded files—will be permanently and irreversibly purged from the system.

7. SUPPORT & CONTACT

If you require assistance, plan upgrades, outlet quota extensions, or billing clarification, please submit an inquiry via the Contact form in the website footer or reach out to the platform administration.
